- Flutter • Dart • JavaScript • Android • iOS • Web • Bloc • GetX • Provider • Firebase • Hive • Neo4j
- GitHub • Git • Fire Store • Realtime Database • RESTful APIs • MVVM • MVC • Shared Preferences
- Google Maps SDK • Agile Methodology • Android Studio • Visual Studio Code • Jira • Azure Boards • Postman

Flutter Developer with 4+ years of experience in building high-quality iOS, Android, and Web applications. Skilled in Dart, Flutter, and clean architecture, with strong expertise in crafting visually appealing, performant, and user-friendly interfaces. Passionate about writing maintainable code, adopting modern development practices, and staying aligned with the latest industry trends. Seeking a challenging role to contribute to innovative products, solve complex problems, and deliver impactful user experiences.

Experience (4+ years)

Specialist – Acsia Technologies May 2025 - Present

Key Projects:

EV Charging Station Monitoring System:

- Developed a real-time **EV Charging Station Monitoring System** using Flutter Web with **BLoC** for state management and **Chopper** for API integration.
- Built major modules including Dashboard, Site/BESS/PCS Overview, Pedestal View, Energy Management, Alarms, and **2D/3D SLD visualizations** with optimized performance.
- Implemented combined **Energy, Power, and Revenue** analytical graphs and delivered a scalable, responsive web application through close collaboration with backend and UX teams.

Tech stack: Flutter Web, Dart, Bloc, Chopper, REST APIs, Git, Azure Boards

Associate Product Engineer – Inference Intelligence LLP Jul 2024 – Apr 2025

Key Projects:

Joggle:

- Implemented functionality to convert address strings to latitude and longitude coordinates for real-time tracking of delivery personnel locations. Developed seamless **live location navigation** utilizing maps for efficient route planning and delivery management.
- Incorporated a **device history tracking** feature that displays a comprehensive log of all logged-in devices and empowers users to remove them.
- Implemented **deep linking, Firebase notifications, order management**, and seamless **cart** integration tailored for e-commerce platforms

Tech stack: Flutter, Dart, Provider, Firebase, Hive, Deep linking, Google maps integration

Developer – Agile Cyber Solutions Feb 2022 – Jun 2024

Key Projects:

My Things (link):

- Designed and executed comprehensive notification features for **friend requests, data sharing, data copies, and user activity**, enhancing user engagement and interaction.
- Improved offline capabilities **by 95% through Hive integration**, while enhancing online features by **30% via Neo4j Database** optimizations.
- Enabled secure data sharing via Azure servers and optimized **data transfer** with Neo4j database management, enhancing efficiency and user data security.
- Utilized device ID retrieval and integrated **OneSignal** for streamlined push notification delivery.

Tech stack: Flutter, Dart, Firebase, Hive, Neo4j, NestJS, Github Actions.

Ram’s Trading (link):

- Implemented **Firebase Notifications** for real-time updates and alerts to users.
- Integrated Google Maps to enable users to find and navigate to store locations efficiently.

Tech stack: Flutter, Dart, Firebase, Google maps integration, RESTful APIs, Firebase Notification

Achievements:

- Received the “Best Employee of the Year - 2022” award
- Received two “Most Innovative Employee of the Month” awards in 2024

Developer Trainee – Agile Cyber Solutions Aug 2021 - Jan 2022

Key Projects:

Note Keeper:

- Implemented Firebase authentication for seamless **login functionality with Google, Facebook, and Apple sign-ins**, enhancing user access and security
- Developed Realtime Database data store functionality for improved data management.

Tech stack: Flutter, Dart, Firebase, Hive.

Achievements:

- Achieved the “Most Improved Developer” award

Education

Bachelor's Degree in Computer Science - Nagercoil Jun 2015 - May 2018

Full Stack Web Development Course - Accord Info Matrix, Chennai Feb 2021 - July 2021
